EXAMINER'S AMENDMENT

1.   An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Joy (Reg. No. 35,562) on February 27, 2012.

The application has been amended as follows:

Claim 8 (Currently Amended) A <u>non-transitory</u> computer usable medium including computer program code for notifying a subscriber of events, the computer program code comprising:

computer program code for receiving a subscriber event request at a call center wherein the call center is a telematics call center facilitating communications to and from a mobile vehicle;

computer program code for creating an event activation table based on the received subscriber event requesting;

computer program code for sending the event activation table to an event table storage system; and

computer program code for sending a subscriber notification including an indicator of an action associated with the event from the event table storage system in accordance with the event activation table using a wireless network to cause a notification to be conveyed to the user and to additionally cause the action to be automatically executed.

Claim 9 (Currently Amended) The <u>non-transitory</u> computer usable medium of claim 8, further comprising:

computer program code for determining a current notification system activity;

computer program code for suspending the current notification system activity for the duration of the subscriber notification; and

computer program code for resuming the current notification system activity upon termination of the subscriber notification.

Claim 10 (Currently Amended) The <u>non-transitory</u> computer usable medium of claim 8, wherein the computer program code for receiving the subscriber event request comprises: computer program code for receiving at least one event with an associated notification date and time.

Claim 11 (Currently Amended) The <u>non-transitory</u> of claim 10, wherein the computer program code for creating the event activation table comprises: computer program code for linking the received event and the associated notification date and time with an access identifier.

Claim 12 (Currently Amended) The <u>non-transitory</u> computer usable medium of claim 8, wherein the completer program code for sending the event activation table to the event table storage system comprises:

computer program code for establishing a data connection between the call center and the event table storage system; and

computer program code for transmitting the event activation table from the call center to the event table storage system using the dam connection

Claim 13 (Currently Amended) The <u>non-transitory</u> computer usable medium of claim 11, wherein the computer program code for sending the subscriber notification comprises:

computer program code for reading a time signal of a real time clock;
computer program code for determining when the real rime signal corresponds with at least one dam and time from the event activation table;

computer program code for activating an event notification system based on the determination; and

computer program code providing the event in accordance with the linked access identifier.

(END OF AMENDMENT)
